

CRANBERRIES

in the classroom

Cranberry States

Today, cranberries are grown commercially throughout the United States in Massachusetts, Wisconsin, New Jersey, Washington and Oregon. Cranberries are the Commonwealth's largest food crop with 200,000,000 pounds of cranberries grown annually on just 13,000 producing acres.

- How many states grow cranberries?
- Color the states red that grow cranberries commercially.
- In which geographical areas of the U.S. are these states?
- What type of climate do these states have?
